

MATTHEW KOLODZIEJCZAK

Front End Web Developer / Software Engineer

matthew-k.github.io/portfolio
makolodzi@gmail.com

I am proficient in front-end development but also have some experience with back-end development. I'm extremely self-motivated and can learn new skills and technologies quickly. I love using my creativity to overcome new challenges.

INDUSTRY RELATED SKILLS

-HTML5 -CSS3 -JavaScript -jQuery -Responsive Design -Bootstrap -Ajax / APIs -Git

EXPERIENCE WITH

-MongoDB -Express.js -Node.js -Model-View-Controller

FEATURED PROJECTS

All projects are responsive and were created by me. To see the live versions, their code, and more projects, visit my portfolio at matthew-k.github.io/portfolio.

Twitch Streams App

-HTML5 -CSS3 -JavaScript -jQuery -MVC -Responsive Design -Bootstrap -AJAX / APIs

This app uses the Twitch API to display and link to some Twitch channels. Users can see which ones are online and offline and can toggle between them.

Haunted Hotspots

-MongoDB -Express.js -Node.js -HTML5 -CSS3 -JavaScript -jQuery -Bootstrap -Responsive Design

This site allows users to share and comment on each others' favorite haunted places. Users have to be logged in to comment on or add a haunted place and they're allowed to edit these submissions.

Pomodoro Clock

-HTML5 -CSS3 -JavaScript -jQuery -Bootstrap -MVC

In this time management app, users set a session length and a break length. The timer counts down the session length and once finished begins counting down the break length. It will then repeat this.

Weather App

-HTML5 -CSS3 -JavaScript -jQuery -Responsive Design -Ajax/API -MVC

A user can see their current location's current weather and three day forecast by using this app. They can also choose to see the temperature in Celsius.

EDUCATION

Here are some courses I've taken to learn web development and software engineering.

The Web Developer Bootcamp | Udemy (online)

JavaScript: Understanding the Weird Parts | Udemy (online)
